This is the second weekly report for the 2011 Flutracking season, therefore only two data points are displayed on the autoreport graphs. Trends in influenza-like illness will be revealed as more weekly data is accumulated. Across Australia, fever and cough was reported by 2.4% of vaccinated participants and 3.0% of unvaccinated participants. Fever, cough and absence from normal duties was reported by 1.2% of vaccinated participants and 1.5% of unvaccinated participants.

For participants this week, 6191/9802 (63.2%) have received the seasonal vaccine so far. Of the 2193 participants who identified as working face-to-face with patients, 1725 (78.7%) have received the vaccine.
