Weekly Interim Report New Zealand

Week ending 13 May 2018

Low levels of influenza-like illness activity

(Current low numbers of participants in NZ could prevent Flutracking from providing a representative picture in NZ. Care should be taken when interpreting this report)

This survey was sent on Monday, 14 May 2018 at 03:13 AM and by 11:00 AM, Thursday 17 May we had received 154 responses (129 last week) from 82 people responding for themselves and 72 household members across New Zealand.

Respondent Numbers by Jurisdiction

State	Respondents	Percentage
North Island	119	77.3%
South Island	35	22.7%
New Zealand	154	100.0%

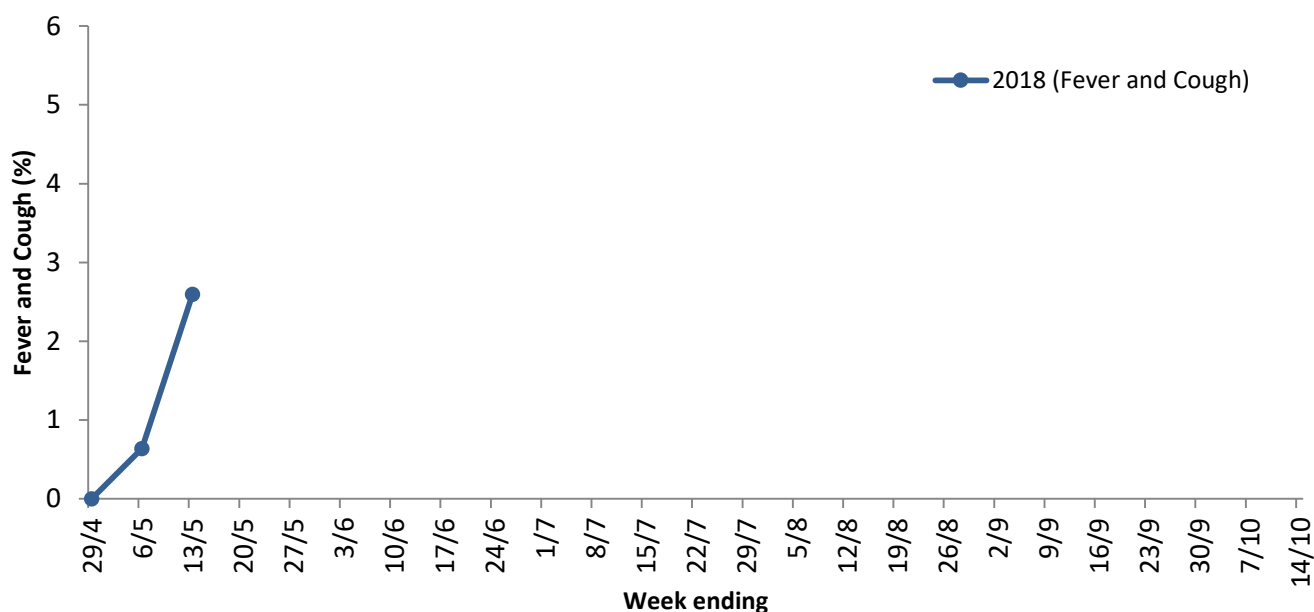

The data presented here should not be treated as authoritative and should always be interpreted together with other trusted sources from the

[New Zealand Influenza Intelligence Report](#)

Across New Zealand, fever and cough was reported by 2.7% of vaccinated participants and 2.5% of unvaccinated participants. Fever, cough and absence from normal duties was reported by 1.4% of vaccinated participants and 2.5% of unvaccinated participants.

For participants this week, 82/154 (53.2 %) have received the seasonal vaccine so far. Of the 12 participants who identified as working face-to-face with patients, 10 (83.3%) have received the vaccine.
