

FluTracking

Weekly Interim Report New Zealand

Week ending 20 May 2018

Low levels of influenza-like illness activity

(Current low numbers of participants in NZ could prevent Flutracking from providing a representative picture in NZ. Care should be taken when interpreting this report)

This survey was sent on Monday, 21 May 2018 at 03:13 AM and by 09:00 AM, Thursday 24 May we had received 361 responses (179 last week) from 201 people responding for themselves and 160 household members across New Zealand.

Respondent Numbers by Jurisdiction

State	Respondents	Percentage
North Island	313	86.7%
South Island	48	13.3%
New Zealand	361	100.0%

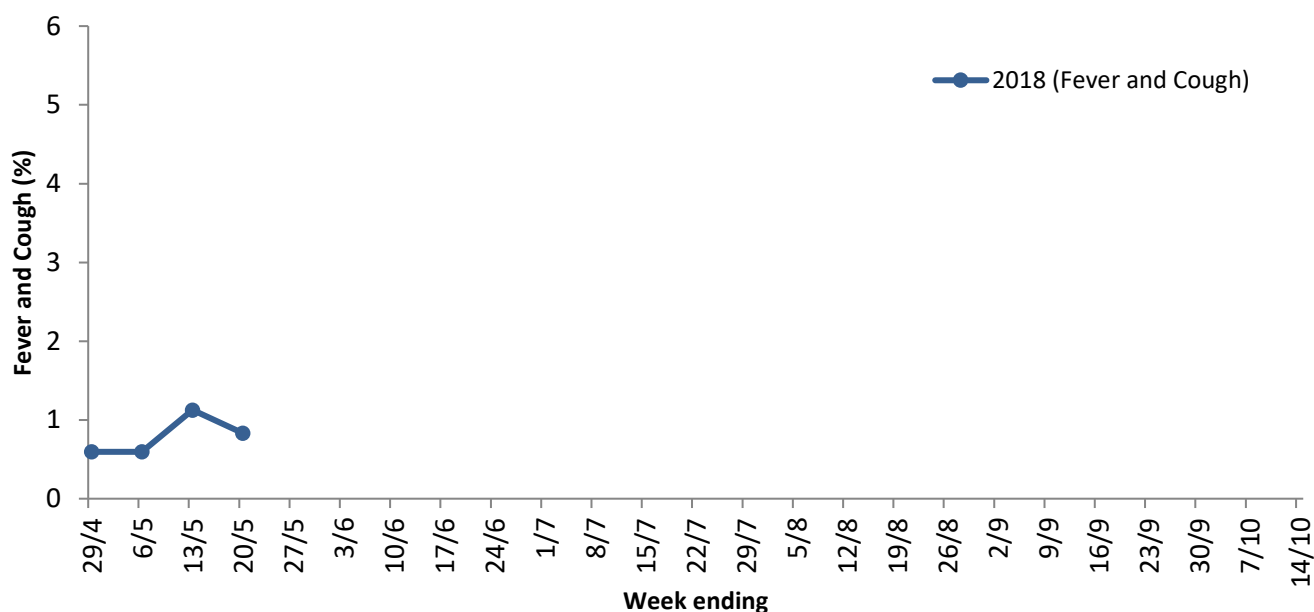

The data presented here should not be treated as authoritative and should always be interpreted together with other trusted sources from the

[New Zealand Influenza Intelligence Report](#)

Across New Zealand, fever and cough was reported by 0.5% of vaccinated participants and 1.4% of unvaccinated participants. Fever, cough and absence from normal duties was reported by 0.5% of vaccinated participants and 0.7% of unvaccinated participants.

For participants this week, 239/361 (66.2 %) have received the seasonal vaccine so far. Of the 38 participants who identified as working face-to-face with patients, 32 (84.2%) have received the vaccine.
