

**Week ending 09 September 2018**

**Moderate levels of influenza-like illness activity  
(Current low numbers of participants in NZ could prevent Flutracking from providing a representative picture in NZ. Care should be taken when interpreting this report)**

This survey was sent on Monday, 10 September 2018 at 03:13 AM and by 09:00 AM, Thursday 13 September we had received 3259 responses (3340 last week) from 1762 people responding for themselves and 1497 household members across New Zealand.

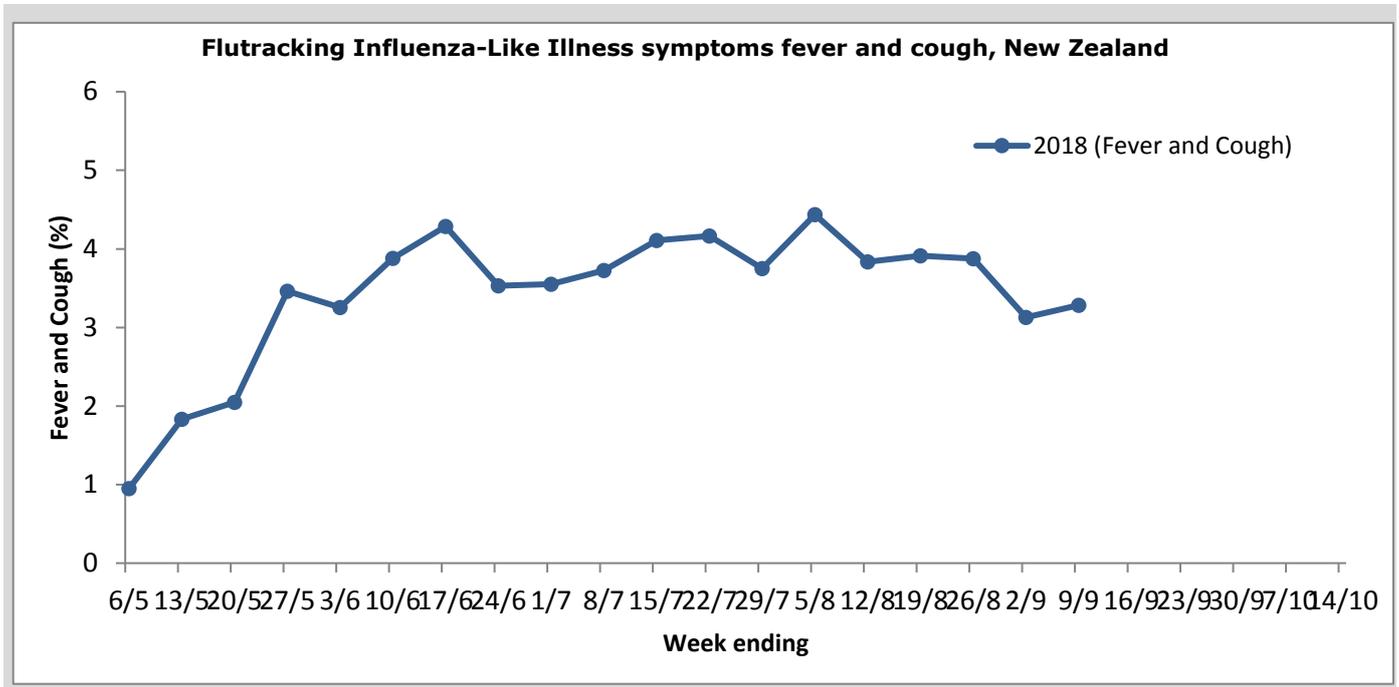

**Respondent Numbers by Jurisdiction**

State	Respondents	Percentage
North Island	2468	75.7%
South Island	791	24.3%
New Zealand	3259	100.0%

Across New Zealand, fever and cough was reported by 2.4% of vaccinated participants and 4.9% of unvaccinated participants. Fever, cough and absence from normal duties was reported by 1.6% of vaccinated participants and 4.1% of unvaccinated participants.

For participants this week, 2102/3259 (64.5 %) have received the seasonal vaccine so far. Of the 390 participants who identified as working face-to-face with patients, 330 (84.6%) have received the vaccine.

The data presented here should not be treated as authoritative and should always be interpreted together with other trusted sources from the [New Zealand Influenza Intelligence Report](#)
