Weekly Interim Report New Zealand

Week ending 16 September 2018

Moderate levels of influenza-like illness activity

(Current low numbers of participants in NZ could prevent Flutracking from providing a representative picture in NZ. Care should be taken when interpreting this report)

This survey was sent on Monday, 17 September 2018 at 03:13 AM and by 09:00 AM, Thursday 20 September we had received 3205 responses (3303 last week) from 1753 people responding for themselves and 1452 household members across New Zealand.

Respondent Numbers by Jurisdiction

State	Respondents	Percentage
North Island	2432	75.9%
South Island	773	24.1%
New Zealand	3205	100.0%

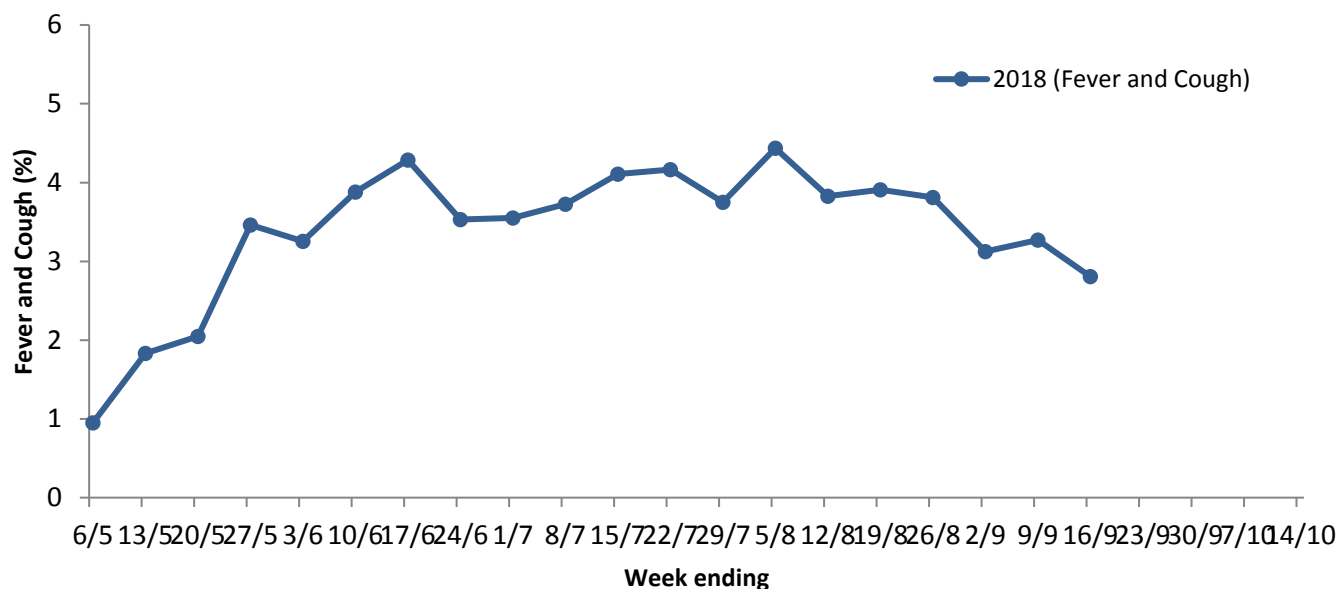

The data presented here should not be treated as authoritative and should always be interpreted together with other trusted sources from the

[New Zealand Influenza Intelligence Report](#)

Across New Zealand, fever and cough was reported by 2.3% of vaccinated participants and 3.7% of unvaccinated participants. Fever, cough and absence from normal duties was reported by 1.7% of vaccinated participants and 3.2% of unvaccinated participants.

For participants this week, 2077/3205 (64.8 %) have received the seasonal vaccine so far. Of the 409 participants who identified as working face-to-face with patients, 340 (83.1%) have received the vaccine.
