# Weekly Interim Report New Zealand

**Week ending 01 September 2019**

## Low levels of influenza-like illness activity

**(Current low numbers of participants in NZ could prevent Flutracking from providing a representative picture in NZ. Care should be taken when interpreting this report)**

This survey was sent on Monday, 02 September 2019 at 03:01 a.m. and by 11:14 a.m., Tuesday 03 September we had received 3939 responses (4071 last week) from 2216 people responding for themselves and 1723 household members across New Zealand.

### Respondent Numbers by Jurisdiction

State	Respondents	Percentage
North Island	2968	75.3%
South Island	971	24.7%
New Zealand	3939	100.0%

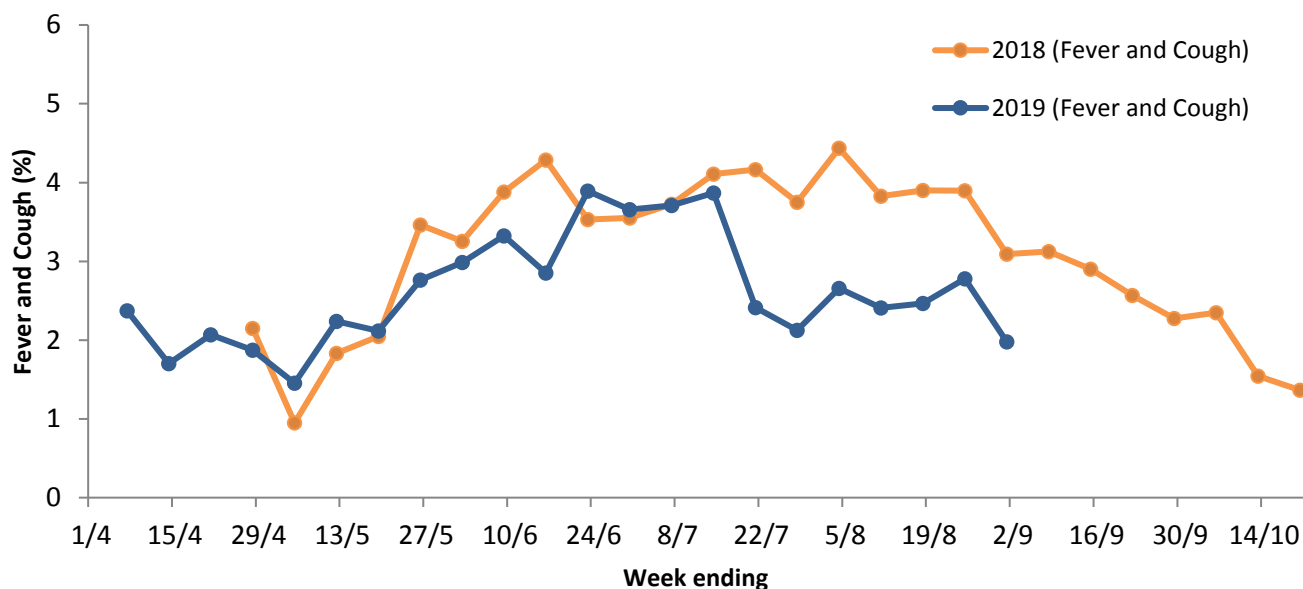

The data presented here should not be treated as authoritative and should always be interpreted together with other trusted sources from the

[New Zealand Influenza Intelligence Report](#)

Across New Zealand, fever and cough was reported by 2.1% of vaccinated participants and 1.7% of unvaccinated participants. Fever, cough and absence from normal duties was reported by 1.8% of vaccinated participants and 1.3% of unvaccinated participants.

For participants this week, 2677/3939 (68.0 %) have received the seasonal vaccine so far. Of the 512 participants who identified as working face-to-face with patients, 444 (86.7%) have received the vaccine.
