Weekly Interim Report New Zealand

Week ending 29 September 2019

Low levels of influenza-like illness activity

(Current low numbers of participants in NZ could prevent Flutracking from providing a representative picture in NZ. Care should be taken when interpreting this report)

This survey was sent on Monday, 30 September 2019 at 03:01 a.m. and by 09:00 a.m., Tuesday 01 October we had received 3785 responses (3779 last week) from 2142 people responding for themselves and 1643 household members across New Zealand.

Respondent Numbers by Jurisdiction

State	Respondents	Percentage
North Island	2859	75.5%
South Island	926	24.5%
New Zealand	3785	100.0%

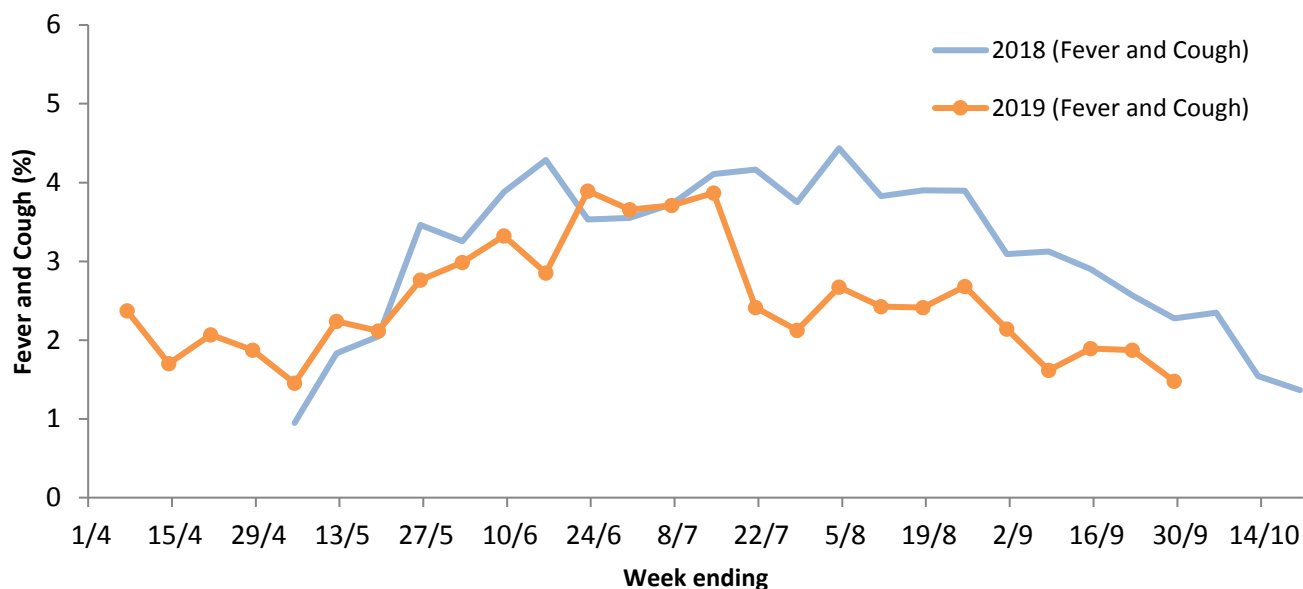

The data presented here should not be treated as authoritative and should always be interpreted together with other trusted sources from the

[New Zealand Influenza Intelligence Report](#)

Across New Zealand, fever and cough was reported by 1.4% of vaccinated participants and 1.6% of unvaccinated participants. Fever, cough and absence from normal duties was reported by 1.1% of vaccinated participants and 1.3% of unvaccinated participants.

For participants this week, 2622/3785 (69.3 %) have received the seasonal vaccine so far. Of the 500 participants who identified as working face-to-face with patients, 433 (86.6%) have received the vaccine.
