Weekly Interim Report New Zealand

Week ending 06 October 2019

Low levels of influenza-like illness activity

(Current low numbers of participants in NZ could prevent Flutracking from providing a representative picture in NZ. Care should be taken when interpreting this report)

This survey was sent on Monday, 07 October 2019 at 03:01 a.m. and by 09:00 a.m., Thursday 10 October we had received 3981 responses (4041 last week) from 2279 people responding for themselves and 1702 household members across New Zealand.

Respondent Numbers by Jurisdiction

State	Respondents	Percentage
North Island	2996	75.3%
South Island	985	24.7%
New Zealand	3981	100.0%

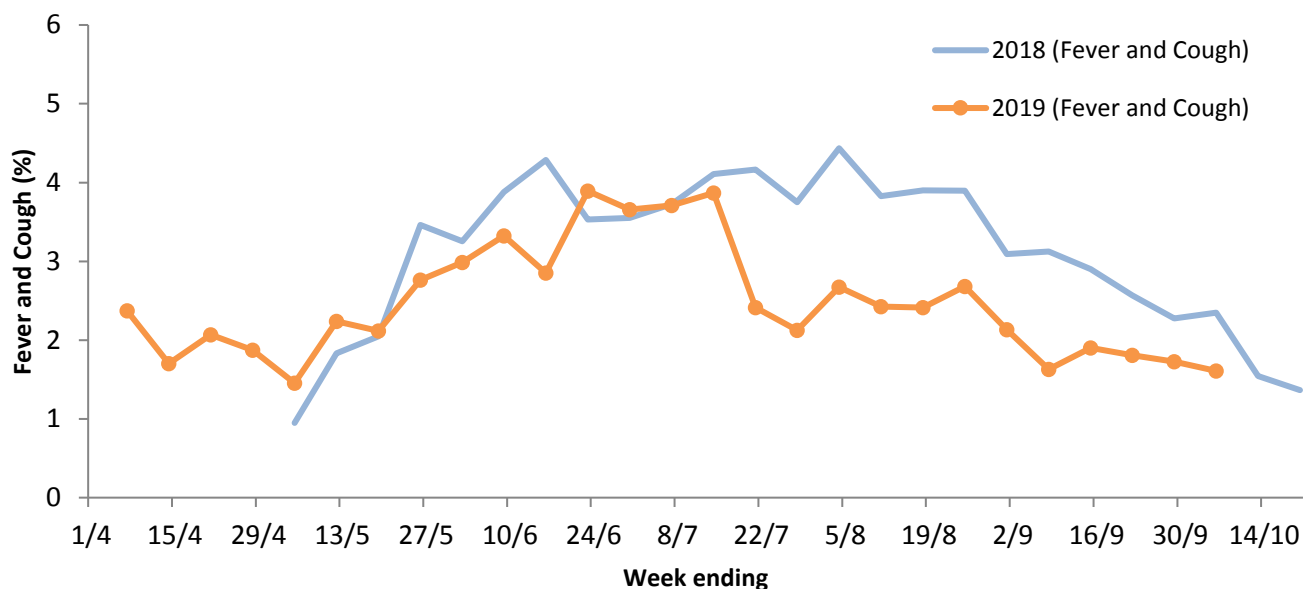

The data presented here should not be treated as authoritative and should always be interpreted together with other trusted sources from the

[New Zealand Influenza Intelligence Report](#)

Across New Zealand, fever and cough was reported by 1.5% of vaccinated participants and 1.8% of unvaccinated participants. Fever, cough and absence from normal duties was reported by 1.4% of vaccinated participants and 1.2% of unvaccinated participants.

For participants this week, 2773/3981 (69.7 %) have received the seasonal vaccine so far. Of the 526 participants who identified as working face-to-face with patients, 459 (87.3%) have received the vaccine.
